Apples---

Apples are among the healthiest of fruits. Baked or stewed apples are a really useful medicine in many cases, as they are very easily digested. Apples are a well recognized laxative and persons who exercise considerably and eat apples plentifully never need take liver pills, which are not as good for their purpose as raw apples, or even baked apples. The apple is such a common fruit that very few persons are familiar with its remarkable, efficacious medicinal purposes. Everybody ought to know that the very best thing he can do is to eat apples just before retiring for the night. Persons uninitiated in the mysteries of this fruit are liable to throw up their hands in horror at the visions of dyspepsia which such a suggestion may summon up, but no harm can come even to a delicate system by the eating of ripe and juicy apples before going to bed. The apple is an excellent brain food, because it has more phosphoric acid in easily digested shape than any other fruit. It excites the liver, promotes sound and healthy sleep, and thoroughly disinfests the mouth.

That is not all. The apple prevents indigestion and throat disease. Apples are asserted by a noted physician to be a good alcoholic drink cure if eaten constantly, two or three a day.

"The Traveling Salesman."

First appearance of Robert E. O'Connor in the production of James Forbes' latest comedy success, "The Traveling Salesman," which will be seen here with the original New York and Chicago cast. Mr. Forbes in his latest effort has produced "Life on the road" as successfully as he depicted "Life behind the scenes" in "The Chorus Lady." The story of "The Traveling Salesman," the scenes of which are laid in Grand Crossing, a village of the middle West, opens on Christmas Day. The first act shows the interior of the railway station, with the meeting of the principal characters, Bob Blake, the traveling salesman, and Beth Elliott, the pretty telegraph operator. Beth owns a piece of apparently worthless land, which suddenly acquires value since it is necessary to a scheme of improvement planned by a railroad company. Blake's employer tries to defraud the girl of her property through a perversion of the law governing the sale of land by the township through unpaid taxes. Of course Bob Blake comes to the rescue. The second act transpires in the drummer's room in the Elite Hotel, and here is shown what is regarded by everyone who has seen the play, the most laughable situation ever employed by a playwright, a poker game.

The play is a series of laughs from start to finish, and if the New York and Chicago critics are to be credited, it is the most witty provoking comedy seen in years.

Will be at Daly's Theatre, Monday, Oct. 30th.

Architect Manning Here.

William H. Manning, the landscape architect, was in this city Monday morning and met the members of the improvement association for the purpose of explaining to them the plan as laid out by him for beautifying the city of Grand Rapids.

Mr. Manning's plans are elaborate and have to be seen to be appreciated. Mr. Manning was unable to give any idea as to what it would cost the city to make the improvements, but to say the least, it will be considerable. Everybody should see the plans and possibly it may induce them with a streak of liberality so that when a few dollars are needed to start the proposed changes they will not do any kicking.

New Episcopal Minister.

Rev. A. Fiedler, M. A., of Irvington, N. J., has been invited to occupy the pulpit in the Episcopal church in this city, and he has accepted the call and will probably arrive here within the next thirty days. Rev. Fiedler visited this city recently and was greatly pleased with the appearance of things. He comes here well recommended.

May Locate Here.

The James Music Company has purchased the stock of goods from the H. H. Lueck Music Company and are selling the same out. The James Music Company may decide to locate a branch store here.

Attorney Geo. P. Hambrecht has received an invitation to attend the banquet at Oshkosh on Thursday which will be given for President Taft. Mr. Hambrecht expects to attend.

Word has been received here by friends of Dr. Blanchard stating that he is now located at Sebastopol, California, where he has a fine position with a large mining company as physician for their camps at a salary of \$2,500 per year.

Warren G. Fisher has resumed his position as assistant cashier in the Wood County National bank after an absence of about three weeks occupied in getting married and settling down to housekeeping. During his absence the position in the bank was filled by D. E. Phillips.

Henry C. Timm, who has been located at Finn, Montana, during the past summer where he was connected with the Walking Dredge Mining Company, returned home yesterday with the intention of spending the winter here. Mr. Timm is well pleased with his summer's sojourn in Montana and reports his health greatly improved by the change.

Brown-Fritzsinger.

Miss Irene Brown and Gerald D. Fritzsinger, both of this city, were married on Saturday morning at Holy Cross Catholic church in Chicago. Father D. D. Hishen performing the ceremony. They were accompanied by Miss Katherine O'Neill and Mr. Harry Golden as bridesmaid and groomsmen.

It seems that Gerald and Miss Irene were inclined to be a trifle secret about the matter and it was kept rather quiet, although neither of them had anything to be ashamed of. They are both well and favorably known in this city, the bride being a most estimable young lady who has made her home here with her sister, Mrs. Oscar Uehling, for a number of years past, while the groom is one of our bright young men who has been engaged in the insurance business for the past two years.

They have many friends here who will unite with the Tribune in extending the heartiest of congratulations and wishing the newly weds a long life of happiness.

If Mr. and Mrs. Fritzsinger will notify their friends when they intend to return home, no doubt the boys will be pleased to meet them at the train with the band, an honor that is not accorded many of our citizens.

Abel-Shekey.

Miss Alma Abel of this city and Mr. Frank Shekey of Wausau were married on Tuesday morning at 10:30 o'clock at the home of the bride's parents, Rev. C. A. Mellicke performing the ceremony. They were accompanied by Miss Irene Shekey and Mr. Kenben Shekey of Wausau as bridesmaid and groomsmen. The house was prettily decorated with ferns and cut flowers.

The bride is well and most favorably known in this city, being the daughter of Mr. and Mrs. Herman Abel, while the groom is a bookkeeper by profession and while not well known here, is said to be a most exemplary young man. Mr. and Mrs. Shekey will make their home at Wausau.

Orpheal-Diedrich.

Miss Fay Orpheal of Vosper and Wm. Diedrich of this city were married on Saturday evening at the home of the groom's parents on the east side, Rev. M. H. Milne of the Baptist church performing the services. They will make their home on the east side. The Tribune extends congratulations.

Merriam-Arnold.

Miss Fannie Merriam of this city and Mr. Walter Arnold of Lake Geneva were married on Thursday, October 12th at the home of the bride's parents, Mr. and Mrs. R. C. Merriam, the marriage service being performed by the Rev. William Fuller, formerly of Stevens Point. Mr. and Mrs. Arnold will make their home at Lake Geneva.

Successful Supper.

The ladies of St. Katharine's Guild gave a very successful harvest supper at the Guild hall on Tuesday evening, at which there was a large attendance. A musical service under the direction of Mrs. I. P. Witter was given after the supper, and the music was pronounced to be of a very high class.

Case Adjourned.

James Moore, the man who was arrested for passing a forged draft on the Centralia Hardware Company, was up before Justice Pomainville on Tuesday, but an adjournment was taken until Friday, the 27th instant to enable to prosecution to obtain a witness.

Carload of Oyster Shells.

Johnson & Hill Co. will receive a carload of oyster shells this week which they will sell at 4 cents per hundred. This is a chance to lay in a supply at the lowest price ever offered in this city. Be sure and get in on a good thing.

Wilbur Briere, who has been employed by a structural iron company the past summer in Alberta and Montana, arrived in the city this week for a weeks visit with his parents before leaving for New York where he will be employed for some time by his firm.

Horses Fall Into Hole.

A team of horses belonging to Anton Gabur of the town of Sigel fell into a hole at the corner of Grand and Third Avenues on Saturday afternoon and it was about an hour before the last horse was gotten out of his predicament neither of the animals suffering any injury outside of a few scratches.

The hole was about five feet in diameter and something like six feet in depth, and was being dug by the water company for the purpose of doing some work on their mains. At the time of the accident John Gustiak was working at the bottom of the hole, but made his escape in time to avoid injury. The team was hitched to a light wagon and was on its way up street when it slipped at the coming street car, the horses going into the hole hind feet first. It was so deep that they could not scramble out, although a derrick was rigged and the first horse was gotten out in a short time. The other horse sat in the bottom of the hole like a dog, and did not seem to take much interest in the proceedings; in fact was about the coolest one in the bunch.

When he was finally hoisted out onto the surface he looked about as if he wondered what the excitement was all about, and did not offer to leave until he was led away, when he was apparently entirely unconcerned about the matter.

Barn Burned.

The barn belonging to James Howlett in the Third ward, was burned to the ground on Friday night, or early Saturday morning, the alarm being sounded about two o'clock Saturday morning.

It is not known how the fire originated, but it had got a good start when it was discovered by Mrs. Howlett, who was awakened by the dog who was crouching in the barn and was making an outcry.

When the fire department arrived on the scene the barn was pretty well gone, and several of the surrounding buildings were on fire. The garage belonging to P. G. Gilkey was on fire, the gasoline tank and automobile being taken out in a hurry to prevent them from being burned, as well as a quantity of goods that had been stored in the shed. As soon as a stream was gotten by the department the surrounding buildings were put out of danger.

There was an insurance of \$200 on the Howlett barn, but the loss will be considerably more than this amount.

John R. Walsh is Dead.

Chicago, Oct. 23.—John R. Walsh died today of heart disease. His death, which came suddenly, followed close on his return from the federal prison at Leavenworth, Kansas. He was paroled from the prison Oct. 14, and returned to his home in this city the following day. It was announced at the time of his return home that it was his intention to resume work and take charge of his business interests after he had taken a rest.

Commercial Club to Meet.

The members of the Commercial Club will hold a meeting at the Forsters Hall on Tuesday evening, October 31st for the purpose of discussing the commission form of government. It is also the intention to take the necessary initial steps for securing this form of government in Grand Rapids. Attorney H. R. Ogden, who is well informed on the subject, has consented to be at the meeting and will address those present.

The commission form of government has been tried in a number of cities, and the general verdict is that it is a success from the standpoint of good government. The board of directors of the Commercial Club would like to have every member of the Club present at the meeting to hear the discussions.

THE SERVICE OF BIRDS.

Among the creatures that render service to mankind, the birds occupy a foremost place. It is their function to suppress the insects that play havoc with the farmer's hard-earned crops. Fifty-three per cent of the food of birds in one locality was found to consist of the larvae of the disease disseminating mosquitoes. Horsemen are the burden not only of horses, but of other valuable stock, and the service of this fly is the natural food of several species of birds. The fever tick so injurious to cattle, is the natural food of the killdeer and the plover. Corn, cotton and other crops are destroyed to a large extent by grasshoppers, and there are at least 23 species of birds that feed upon grasshoppers. Grass lands and grain crops in general suffer greatly from various insect pests, which are destroyed in vast multitudes by birds. The greatly dreaded boll weevil is food for the plover, the killdeer and others of the feathered tribe. It is a common experience to see birds following the plow and consuming grubs that are destructive to garden and other valuable plants. These friends of the planter should in every state be protected by right legislation.

The announcement by a Boston physician that electrifying the atmosphere of crowded apartments will make dull pupils bright and indolent workmen active may be worth looking into. It is possible that it would even make drowsy churchgoers attentive to long sermons. There is a stimulating influence in ozone, and this the electric current, as employed by the doctor, is said to diffuse in the atmosphere. Of course, it cannot be a substitute for fresh air. Ozone is not oxygen, and oxygen is as essential to life as electricity. It is likely that they will permit in cities as a necessary evil, but parents who can give their children the benefit of the larger, freer life of a separate home should never hesitate to do so.

The Chicago health board secretary who condemns all bats as bad morally and physically—undt places a melancholy truth. It is likely that they will permit in cities as a necessary evil, but parents who can give their children the benefit of the larger, freer life of a separate home should never hesitate to do so.

BIG BATTLE NEAR

CHINESE REBELS, 65,000 STRONG, ARE ADVANCING ON 20,000 MANCHU TROOPS.

CAPITAL OF HONAN FALLS

Kai-Fung Is Already in Hands of Revolutionists and Nanking and Other Cities Are Surrounded—German Marines Fight Mob.

Peking.—The fall of Nanking is probable and the rebels now occupy Kai-Fung, the capital of Honan province.

The greatest battle of the war is imminent as 65,000 revolutionary troops are marching against 20,000 Manchu soldiers sent from here to the relief of Kai-Fung and other cities in Honan province.

The imperial government has begun aggressive preparations for the recapture of Hankow and Wu-Chang. The first train load of troops from the north has arrived and camped north of Hankow. A detachment of the Wu-Chang garrison, which retreated from that city when the rebels entered, crossed the River Yangtze above the city and marched inland, probably to effect a junction with the troops from the north.

The imperial naval force in the river was augmented by the arrival of one of the navy's modern gunboats, which carried Admiral Sui Chen Ping, who took command of the situation.

The foreign consuls that the foreign consuls would not be endangered by any bombardment he might undertake. His purpose, it was believed, was to begin shelling the rebel defense around Wu-Chang.

The Red Cross society, organized by the revolutionary leaders, began receiving the heaped up corpses from the streets of Wu-Chang. Well-to-do Chinese are subscribing liberally for the work.

Revolutionary determination to end the regime of official graft was brought sharply to attention by the appointment of an officer appointed to collect funds for the rebel cause. He was caught attempting to divert some of the money to his own pocket and was promptly beheaded.

No truce is leaving the Hankow terminal for the north. It is uncertain when service will be resumed. The foreign consuls that the foreign consuls would not be endangered by any bombardment he might undertake.

The information of the legations indicates that only the first statement of the official communication is strictly accurate.

Hankow.—A German force of machine guns reinforced by German local residents, has been landed at Hankow and engaged in a fight in the streets with a Chinese mob.

BATH TUB TRUST SMASHED

Government Wins Case at Baltimore and Alleged Illegal Combination Must Dissolve.

Baltimore, Md.—The "bathtub trust" is ordered dissolved. The government sues its suit against the Standard Sanitary Manufacturing company and others, and a decree handed down by Judge John C. Rose in the federal circuit court held the concern to be in violation of the Sherman anti-trust act and a combination "unreasonably" restraining trade.

The decision, rendered by Edwin P. Cameron, special assistant to the United States attorney, and United States District Attorney John Philip Hill of Baltimore, who conducted the case for the government, stated that the decision supports the government's contention on every point.

ROYAL DUKE IN CANADA

Connaught is Sworn in as New Governor of British Dominion with Imposing Ceremony.

Quebec.—The duke of Connaught, the new governor general of Canada, arrived in the harbor last night aboard the steamer Empress of Ireland. There was a crowd at the dock, but his royal highness and the duchess remained in their suite and only a few officials and friends gained the privilege of welcoming them to Canada.

The official landing of the duke and duchess took place this morning and the ceremony of swearing in the duke followed shortly afterwards in parliament.

M'NAMARA IS VICTOR

TALESMAN NELSON EXCUSED AFTER FOUR-DAY FIGHT.

Admits He Had Formed Opinion Which Would Take Strong Evidence to Change.

Los Angeles.—The four days' fight against Z. T. Nelson, a ventriloquist, as a juror in the trial of James B. McNamara, who, with his brother, is accused of having blown up the Los Angeles Times building, ended with a victory for McNamara.

Nelson was dismissed after the state had withdrawn its objection to a challenge for cause, and after Nelson had admitted that he had formed an opinion of the guilt or innocence of the prisoner and that it "would take mighty strong evidence to shake him."

Judge Bordwell questioned Nelson and he admitted he had obtained information about the alleged dynamiting of the "Times building" from persons with whom he had talked and from newspapers.

"If you were chosen as a juror in this case could you and would you, notwithstanding the opinion you now formed, act impartially on the evidence submitted to you?" Judge Bordwell asked.

"It would take pretty strong evidence before I would," was the reply. A wrangle between lawyers as to whether he should have answered yes or no followed and Nelson said he could not answer the question. The state then withdrew its objection and Judge Bordwell permitted Nelson to sit out. This ended the first skirmish in the trial.

McNamara was silent throughout the sessions. He maintained a strong interest in the examination of the talesman, but offered no suggestions.

JOHN R. WALSH IS PAROLED

Former Banker Leaves Leavenworth Prison for Chicago Home After Serving More Than Year.

Leavenworth, Kan.—An order from Washington paroling John R. Walsh, the former Chicago banker and railway president, was received at the Federal prison here. The prisoner at once began preparations for the start home.

Mr. Walsh up to the time of his parole had served one year eight months and twenty-six days of his five-year sentence.

The order of parole arrived from Washington. When told that he was to be released the aged prisoner plainly showed his pleasure.

The aged banker's son met his father as he emerged from the prison gates and accompanied him home.

TAFT TRAP FOILED

THIRTY-SIX STICKS OF DYNAMITE AND A FUSE ARE PLACED UNDER BRIDGE.

Train Saved by Watchman

He Exchanges Shots With Two Men Discovered on Southern Pacific Railroad Structure Over Which President's Special Was to Pass.

Santa Barbara, Cal.—Had it not been for the vigilance of C. B. Brown, a section foreman, the special train bearing President Taft from San Francisco to Los Angeles probably would have been blown up by dynamite 20 miles below the city.

The dynamite was blown up by dynamite 20 miles below the city. The Southern Pacific Brown discovered 35 sticks of dynamite under the watchman engaged in a revolver battle with two men, who escaped.

The dynamite was discovered at 5:51. The night watchman saw two men on the bridge shortly before 2 o'clock. They were at the opposite end of the 1,000-foot span and ran when ordered to halt.

The watchman hurried across the bridge, firing several shots, which were returned.

After the pair had escaped in the darkness the watchman returned to the bridge and began an investigation. Near the center of the span, he found the 35 sticks of dynamite, with a ten-foot fuse attached to one of the sticks. He left the find untouched, going immediately to Santa Barbara and notifying the officials.

Sheriff Wines of Santa Barbara county went at once to the bridge with several deputies and removed the dynamite. A general search is being made for the men.

JUSTICE J. M. HARLAN DEAD

Oldest Member of United States Supreme Court Succumbs to Attack of Acute Bronchitis.

Washington.—Associate Justice John M. Harlan of the Supreme court of the United States died at his home here of acute bronchitis. He was seventy-eight years old.

Justice Harlan was the oldest member of the Supreme court, for years was conspicuous in Kentucky politics, once was candidate for vice-president of the United States, was a foremost constitutional authority and was prominent in the councils of the Presbyterian church.

Justice Harlan had been ill with acute bronchitis less than a week.

Mr. Harlan was commissioned an associate justice of the United States Supreme court November 29, 1877, taking his seat as a member of that body December 10 of the same year.

HUMANE SOCIETIES TO HAVE BENEFIT

October 28 Has Been Decided On as Tag Day.

BADLY IN NEED OF MONEY

From Fifty to Seventy Matrons Will Act as Chaperones to the Two Hundred and Fifty Young Women Taggers.

Madison.—The Badger State and Wisconsin Humane societies have decided to have a tag day, October 28, for the purpose of raising funds for the two societies. Both are badly in need of money to carry on their work.

It was decided to have fifty to seventy matrons to act as chaperones. Lunches will be provided for the workers. It was also decided to offer prizes for the taggers, to be selected later on.

The tag will be made of pasteboard, inscribed on both sides "Badger State and Wisconsin Humane Societies." It will be printed in blue with white letters. On the middle will be a horse, a dog and a child. Thirty thousand tags have been ordered. These were appointed to act: For the Badger State Humane society—Mrs. Charles G. Gobleman, Mrs. George Bailey, T. J. Dunbar, Spitt. G. P. For the Wisconsin Humane society—Mrs. A. J. Madison, Mrs. S. B. Bruce and Spitt. H. L. Phillips will act.

Urges Fight on All Diseases. That the Wisconsin Anti-Tuberculosis association should retain its name, but that it should extend the scope of its work in a campaign against all malignant diseases, including the black plague, was the theme of speakers on "Shall the Wisconsin Anti-Tuberculosis association broaden its scope so as to embrace all preventable diseases?" in Ethical hall, Milwaukee. The debate was held under the joint auspices of the anti-tuberculosis association and the Wisconsin Conference of Charities and Corrections.

Dr. C. A. Harper led for the negative, and Dr. T. L. Harrington opened for the affirmative. There was but little disagreement, it having been the sentiment, however, that the name ought not to be changed.

Dr. John M. Beffel urged that the broader work be done through the tuberculosis association. He said, "before anything strong can be done we will have to reorganize the whole problem of public health in Wisconsin."

Dr. Harrington urged that the state board of health take up the black plague problem and entere the list of instruction regarding the dangers of the social evil. He joined other speakers in criticizing inefficient health officers, of which he said there were many.

Following are the officers elected by the anti-tuberculosis association: President, Prof. M. P. Ravennel, Madison; first vice-president, Dr. W. W. Wineshield, Kenosha; second vice-president, Dr. Louis R. Reber, Madison; Dr. W. D. Frost, Dr. C. A. Harper, Dr. E. Evans, Dr. G. W. Wineshield, Dr. J. W. Coon, Dr. Brockway, Dr. C. A. Baer, J. H. Koppeler, Dr. G. E. Seaman, Dr. J. J. McGovern, Dr. T. L. Harrington, Dr. J. M. Beffel, Dr. Kirkpatrick, Dr. J. M. Beffel, Dr. Deenhot, executive secretary, and Dr. Chalmers B. Traver, assistant.

TELLS OF \$100,000 "FUND"

Lieut. Governor Morris on Stand in Stephenson Inquiry Names Robert J. Shields as Receiver.

Milwaukee, Wis.—"I have been told by Mr. Cook, partner of Edward Hines, that approximately \$100,000 was paid by Hines and Senator Stephenson to certain men, one of whom was Robert J. Shields, to be used in the election of Senator Stephenson," said Lieutenant Governor Morris at the Stephenson inquiry.

He said Mr. Shields went to Washington and saw Senator Stephenson and came back with a check for \$20,000, and was told that a man named Sanderson, a former assistant sergeant-at-large of the senate, had told C. H. Crownhart of Superior that he had knowledge that part of this money went to the Democratic members of the assembly who walked out on the day when Senator Stephenson was elected. The money was used to induce the Democrats to leave the joint assembly.

"Cook further said that Shields demanded \$15,000 for his services and that Hines and Senator Stephenson got into a dispute about it. He said that later the matter was settled by the payment of \$7,500 to Shields and a certain line of insurance."

Woman's Club State Meeting.

The fifteenth annual meeting of the Wisconsin Federation of Women's Clubs opened at Green Bay in the Union Congregational church, in the singing of the national hymn, "Blest Be the Tie That Binds." Mrs. W. P. Leck of Racine pronounced the invocation, and Mrs. John P. Martin, president of the Green Bay Woman's club, welcomed the delegates in a graceful speech, to which response was made by Mrs. Louis Reber.

Favor Tuberculosis Test. The Wisconsin State Veterinary society voted against the repeal of the tuberculosis test law by the last legislature and condemned those who were instrumental in its repeal. At the convention in Milwaukee, Resolutions were adopted protesting against the repeal of the law, and the state legislature to make the test. Recommendation that any veterinarian who falsified a test report should be deprived of his license was adopted.

Liability for State Taxes. State Insurance Commissioner H. L. Ekern gave a ruling in answer to a request of the Lakeside Paper company of Appleton to the effect that any person taking out a fire insurance policy in a company unauthorized to do business in Wisconsin would be liable for the state taxes of such company. Commissioner Ekern was in New York to meet a special committee of state tax assessors here to an effort to adopt a standard of provisions for health and accident insurance policies.

Explains Income Tax. The state tax commission is busy preparing printed copies of the new income tax law, with explanatory notes touching upon some of the doubtful points of the law, for distribution throughout the state. Many requests for copies of the law have been received by the commission, which will distribute the copies in 5,000 lots.

Between 200 and 300 candidates for positions as income tax assessors have filed their applications with the tax commission. The state civil service examination will be held November 11.

Explosion Kills an Aviator. Berne, Switzerland.—The aviator Hans Schmidt, was killed while making an exhibition flight. His machine fell 150 feet, the engine exploded and the aviator was incinerated.

Mr. and Mrs. Fred Fox of Mehan were in the city on Monday and while here favored the Tribune office with a pleasant call. Mr. Fox reports that in spite of the wet weather nearly everybody has been engaged in digging their potatoes and getting in their corn crop, and that everything is turning out good.

The Catholic Order of Foresters gave one of their pleasant parties at their hall on Thursday evening which was attended by a large crowd of Foresters and their friends. A chicken chowder was served during the evening, the chowder being prepared by Messrs. Oliver Trudell and H. Smith, both experts at the business. Card playing and dancing was also indulged in and a most enjoyable evening was spent.

R. N. Boynton, a resident of Pittsville for many years, but who is now making his home with his son at Oshkosh, has been spending several days in the city the past week visiting among friends here and at Pittsville. Mr. Boynton is in his ninety-fifth year and reports enjoying pretty good health. While in the city Mr. Boynton called on his old friend, Archie McMillan, who has been confined to his bed for the past two months with sickness.

The band gave a dance at the Amusement hall last Friday evening and there was such a good crowd in attendance that they didn't lose a cent. The boys thoroughly appreciate an affair of this kind and intend, in view of the success of their first dance, to give three more, the next one to occur on Friday night of this week, when it is hoped there will be another turnout fully as large as the last one. The members of the band like to know that their efforts are appreciated and if they can get thru the series without losing any money it is probable that they will conduct another series of a like nature later in the season, as the boys all like to play.

Earl Hill returned on Monday from a visit of several days at Madison.

Eli Grotteau of Marshfield transacted business in the city on Monday.

Atty. E. C. Pors of Marshfield was a business visitor in the city on Monday.

A. H. Sydow of the village of Port Edwards brought in several fine samples of white dent corn which he raised on his place the past season. The corn is as nice as any that has been brought in here.

John T. Pagel of Rudolph brought in an eagle on Tuesday that he shot near his place. The bird measured seven feet across the wings. Mr. Pagel also brought us in a large potato to add to our vegetable display.

The legislature of California last year appropriated the sum of \$6,000 for the erection of guide boards to guide travelers to water holes. Here in Wisconsin we have to stoke up guide boards to keep travelers out of the water holes.

John Hayden of Marshfield spent Friday in the city doing some repair work on the boilers in the old Wood County bank building. Mr. Hayden is an expert at this line of work and has many customers here among the mill men.

A. W. Tuttle, who for a number of years made his home in this city, recently died at Endeavor of pneumonia. Mr. Tuttle came here as an insurance agent but later abandoned this work and acted as clerk at the Dixon hotel for some time. While here he made many friends who will be sorry to hear of his death.

Louis Reichel has decorated his jewelry store on the west side in a novel and unique manner. Two arches were placed across the store which were trimmed in an artistic manner with sections of corn on the ear, interspersed with silverware and other things that would lend an artistic effect to the general makeup. The decorations are well worth looking over.

G. H. Monroe of Kellner has about decided to put in a telephone exchange at that point in order to supply the farmers in that vicinity with service. For a number of years past the farmers east of the city have been desirous of being furnished with some sort of telephone service, but nobody has taken the initiative in organizing a company. As yet the plans have not been completed, but it is expected that there will be a number in that locality who will be glad to go in.

Geo. N. Wood made a trip down river last week as far as Barnum, leaving here Thursday morning by boat, and getting back Saturday. The water was something above the nine foot mark when he left here and Mr. Wood thought it would be quite a novel experience to make the trip when the water was high, and he was not disappointed. He found the river from a mile to two miles wide below Nekosha, all of the farms on the lowland being submerged. His only regret is that he did not make the trip when the water was at its highest mark.

Attorney General Bancroft has ruled an answer to an inquiry from the state board of health, that the individual towel law passed at the last session of the legislature applies to restaurants and other places where towels are furnished primarily for the use of employees, but incidentally used by patrons. Roller towels can only be used in public places by special permission of the state or local health board. The policy of these boards is to issue such permits only when there is good reason for doing so.

Dr. McElwee, who will be at the Dixon House on Tuesday of next week has for many years been well known as a leader among physicians treating chronic diseases. The doctor lives in Madison and has just returned from a six months visit in Europe where he spent some time in the principal medical centers.

Dr. McElwee has never been satisfied with "laxing well enough alone" but has endeavored to keep at the top of his profession by seeking fresh knowledge and newer and more effective remedies in all parts of the world. Doubtless many old friends will welcome his return.

Ray Johnson departed on Tuesday evening for Minneapolis to be gone several days.

W. H. Chase of Necedah was a guest at the home of Dr. A. L. Ridgman over Sunday. Mr. Chase drove up a fine driving horse which he sold to Dr. Ridgman.

Mr. and Mrs. John Schnabel are spending a week in Superior visiting their daughter Mae, who is attending normal school. They will also visit Minneapolis before returning.

Kirk Muir, who had been visiting his people in this vicinity for a week past, returned to Wales on Monday to continue his treatment in the sanatorium there. Kirk is looking well and reports himself as feeling first rate.

The Three Twins as presented at Daly's Theatre Monday night was one of the snappiest productions that has appeared here for some time and the audience was well pleased. There was something doing every minute, and there was plenty of good singing, making it a very pleasant evening from beginning to end.

O. G. Malde, who is inspector in this vicinity for the American Fruit Exchange, reports that there will be fully fifty carloads of cranberries shipped out of Wood County this fall, the cars averaging about 120 barrels to the car. The Wisconsin berries are pretty generally of fine quality this year, well colored and good sized.

B. P. Godel of Portage was in the city on Tuesday and favored the Tribune with a pleasant call. Mr. Godel was formerly with the American Type Founders Company of Chicago as traveling salesman and in this capacity he was well known to the printers of the state as any man on the road. Mr. Godel is now engaged in the printing business at Portage.

George Sidney of the "Busy Body" company, a comedian who is not afraid of surrounding himself with people who can entertain, and his associates are all given ample scope for an exhibition of their various talents. The different performers will have an opportunity to shine in the specialty numbers of the program and will introduce some of the song hits that have been written for this production "Busy Body" will be seen at Daly's Theatre soon.

Stevens Point Journal:—An agreement has been entered into between the Wausau street railway company, the Mosinee paper mill and the Rothschild paper mill, whereby a joint power line to connect the three plants will be built. The right of way has been secured and the work of construction will commence at once. It is proposed to string a wire capable of carrying 15,000 volts, although it is not expected that more than 13,000 volts will be transmitted over it. The first use of this power line will be to transmit power to the Rothschild plant, and up to the time that company completes the addition to their dam made necessary by the recent flood, their power will be generated by the waters of Little Bull Falls at Mosinee. This arrangement was made necessary by the damage that was caused to the Rothschild dam and mill by the recent flood.

Necedah Republican:—Nightwatch Bernard made a son-strike last Friday night when he caught a couple of fellows in the act of robbing a man near the Northwestern depot. It was past the midnight hour when Bernard walked down in that vicinity, and hearing voices, he went down to see what was going on. Upon striking a match, he discovered two fellows, James Adams and Selvan Janset by name, in the act of "rolling" a fellow by the name of Harry Smith. One fellow was holding the victim, while the other was going through him. They had his shoes off, had taken his watch and a small amount of silver. Smith had a roll of bills in one of his shoes, and his friends knew it, and that explained why they were so anxious to get his footwear. Bernard gathered them in, lodged them in jail to await hearing the following morning. The charge against them was preferred against them so that Justice Darrow might have jurisdiction in the case, and the men were given twenty days each in the county jail. Mr. Bernard had had anything but an enjoyable job the past few weeks, but he had kept the hoboes and drunks well in hand, and has hurried dozens of them over to the next town.

The Old Folks at Home. A gentleman who recently returned from a trip to Europe extending over several months, offers the very laudable suggestion that the many young men scattered over this land of ours should remember the old folks at home. This was the outcome of an experience while visiting a suburb of Glasgow. There he met a fine old Scottish gentleman and his wife who, learning that the traveler was from America, asked if he had seen or heard anything of their boy. Three or four years before the young man had come to the new world, and his letters for a time were frequent and full of hope. He had labored for some time in the Wisconsin woods and later came to Minneapolis. So interested did the American become that upon his return home he employed an agency to look up the boy, and although they learned something of him and that he had fallen among evil companions, lost his money, and started for the far west, they found no trace of him.

In relating this experience, the gentleman expressed the hope that this story would reach the hundreds of young men who leave their homes, never home ties and forget the old folks at home, and that those who happen to read this story would remember that "someone, somewhere, has a heart interest in their successes and failures; that some old father and mother may be going down the last incline of life with the hope of some message from the lad who went away. In poverty or riches, in happiness or misery, in honor or shame, no one in the world sympathizes with the boy more, than those to whom he owes his being."—Ex.

This arrangement was made necessary by the damage that was caused to the Rothschild dam and mill by the recent flood.

Necedah Republican:—Nightwatch Bernard made a son-strike last Friday night when he caught a couple of fellows in the act of robbing a man near the Northwestern depot. It was past the midnight hour when Bernard walked down in that vicinity, and hearing voices, he went down to see what was going on. Upon striking a match, he discovered two fellows, James Adams and Selvan Janset by name, in the act of "rolling" a fellow by the name of Harry Smith. One fellow was holding the victim, while the other was going through him. They had his shoes off, had taken his watch and a small amount of silver. Smith had a roll of bills in one of his shoes, and his friends knew it, and that explained why they were so anxious to get his footwear. Bernard gathered them in, lodged them in jail to await hearing the following morning. The charge against them was preferred against them so that Justice Darrow might have jurisdiction in the case, and the men were given twenty days each in the county jail. Mr. Bernard had had anything but an enjoyable job the past few weeks, but he had kept the hoboes and drunks well in hand, and has hurried dozens of them over to the next town.

The Old Folks at Home. A gentleman who recently returned from a trip to Europe extending over several months, offers the very laudable suggestion that the many young men scattered over this land of ours should remember the old folks at home. This was the outcome of an experience while visiting a suburb of Glasgow. There he met a fine old Scottish gentleman and his wife who, learning that the traveler was from America, asked if he had seen or heard anything of their boy. Three or four years before the young man had come to the new world, and his letters for a time were frequent and full of hope. He had labored for some time in the Wisconsin woods and later came to Minneapolis. So interested did the American become that upon his return home he employed an agency to look up the boy, and although they learned something of him and that he had fallen among evil companions, lost his money, and started for the far west, they found no trace of him.

In relating this experience, the gentleman expressed the hope that this story would reach the hundreds of young men who leave their homes, never home ties and forget the old folks at home, and that those who happen to read this story would remember that "someone, somewhere, has a heart interest in their successes and failures; that some old father and mother may be going down the last incline of life with the hope of some message from the lad who went away. In poverty or riches, in happiness or misery, in honor or shame, no one in the world sympathizes with the boy more, than those to whom he owes his being."—Ex.

WHEN you invest in a watch, make it a life-time investment. Pay enough to secure a watch that is made to give a life-time of reliable service.

A cheap watch won't last a lifetime. It cannot keep reliable time. That is why you must not buy a watch by its case, for most cheap watches have showy cases. They are made to sell on appearance. You can be sure of a

Chronic Diseases

will visit Grand Rapids, at the Dixon House, on

Tuesday, Oct. 31st

It is 15 years since I first visited Grand Rapids, and throughout Wood County many persons will gladly testify that they owe their present good health to my successful treatment of one or more of the following chronic diseases:

Stomach and Bowel Troubles, Kidney, Liver and Bladder Ailments, Nervous and Skin Diseases, Etc.

Persons afflicted with Asthma or Goitre should not delay in getting a month's trial treatment of my special remedies for these distressing and dangerous diseases.

Patients suffering from Catarrh in any form, or Tuberculosis in its earlier stages, will be surprised and delighted with what my Special Lung Treatment will do for their cases.

In brief, I cordially invite all sufferers from chronic diseases, both Men and Women, to call and consult me in regard to their cases.

NO CHARGES.

German and English spoken.

Some Shakespeare Statistics.
A Shakespearean enthusiast has a list of statistics for the plays. "Hamlet" is the longest play, with 3,930 lines, and the "Comedy of Errors" the shortest, with 1,777 lines. Altogether the plays contain 1,227 characters, of which 167 are females. The longest part in the plays is in "Hamlet." The part with the longest word in it is that of Costard in "Love's Labor Lost," who tells Moth that he is "not so long by the head or honorable indigitation."

Leading a Dog's Life.
"Your husband says he leads a dog's life," said one woman.
"Yes, it's very similar," answered the other. "He comes in with muddy feet, makes himself comfortable by the fire and waits to be fed."—Everybody's Magazine.

Where It Belonged.
"Where are you going?"
"To fetch some water, sort."
"What in those respectable trousers?"
"No, sort, in this 'oro pilli'."—London Opinion.

Not Surprised.
"I am sorry, my dear young lady, but you have a black future before you."
"That's no news. I've just been promoted to the mourning department in the store where I am employed."

One Resemblance.
"They tell me that aviator you engaged was a bird."
"We thought, so after he displayed his bill."

FROM TEXAS
Some Coffee Facts From the Lone Star State.

From a beautiful farm down in Texas, where gushing springs unite to form babbling brooks that wind their sparkling way through flowery meads, comes a note of gratitude for delivery from the coffee habit.

"When my baby boy came to me five years ago, I began to drink Postum, buying a feeling that it would be good for him and me than the old kind of drug-laden coffee. I was not disappointed in it, for it enabled me, a small, delicate woman, to nurse a bouncing, healthy baby 14 months.

NOTES From MEADOWBROOK FARM

By William Pitt

Sheep are scavengers.

Don't crowd your chickens.

Wheat responds readily to good culture.

Do not be in too much of a hurry to wear the pigs.

The separator should be thoroughly washed after it is used.

Sheep require less pasture than any other animal on the farm.

More horses are spoiled by poor drivers than any other way.

The cream should be delivered not less than three times a week.

It is quite customary to feed a horse doing reasonably hard work, one

You should have a cooker in order to get the best results with fall pigs.

Give the dairy cows plenty of water and let them consume all the water they need.

The hen is admitted to be one of the greatest financial factors in the country today.

Stock carrots are a valuable root crop and will yield ten to fifteen tons on rich, loamy soil.

Changes in the richness of milk can alter the proportion of skin milk to cream delivered.

The world's herd of swine numbers 100,000,000, two-fifths of which belong to the United States.

Bran is a good ration for the horse, but must not be fed too frequently, or it will cause indigestion.

The check-rein is a check, not so much on the action of the horse, as upon its general efficiency.

Where skimming is done by means of a centrifugal separator the richness of the cream may also vary.

Corn may be fed to advantage in the bundle when spread on a clean, dry feeding yard or in racks.

A fertile, clean and fine surface soil, and the strawberry make a strong combination as a mortgage lifter.

Pigs and sheep in the orchard will, by eating up fallen fruit, reduce the spread of insect and fungus diseases.

Corn should be grown in rotation with other crops to control insect pests and soil diseases peculiar to the crop.

The greatest handicap to the egg trade is the general store, with its custom of bartering merchandise for eggs.

After the grain is cut and stacked, sheep are turned on the stubble to eat the weeds which otherwise would go to seed.

The length of time required to blanch celery sufficiently for marketing will depend largely upon the variety being grown.

The dairy farmer must bring his product above suspicion and any other course has in it neither profit, dignity nor good citizenship.

Do not attempt to pull onions from the soil with an iron tooth rake which will so injure the bulbs that they will become soft and decay.

One of the greatest needs in improving the condition of eggs on the farm is to provide not only sufficient number of nests, but clean ones as well.

The sugar cane and the allied plants exclusively in any stage of development are not desirable food for horses, nor for any of the domestic animals.

Many farmers are giving their cows a good grain ration, but a few minutes' brushing every day would be better than the last two pounds of grain that is fed.

The bone of most poultry yards to-day, and this applies not only to those on the farms but also to many exclusive poultry plants, is makeshift equipment.

The colt in the pasture should have its feet cared for as closely as the matured animal in order that he may grow to maturity with feet in a healthy condition.

The best breeding calls for animals capable of reproducing all those qualities of an ever improving nature which go to make perfect in the type we are aiming at.

Small pigs take to green feed about as early in life as to any feed and such green stuff as clover, alfalfa, peas or vetch or good pasture are the very best side dishes that a pig can be given.

A composition made of carbolic acid, half ounce; glycerine, eight ounces, is recommended as being good for treating wounds made on horses or cattle by barbed wire fences.

Cucumber seeds may be a little difficult to save, but it will pay you to go out into the patch and gather the long, smooth specimens and place them where they will be out of the reach of the chickens.

Storing feeding corn to pregnant and nursing sows and to young pigs, and there will be little if any trouble from rotting, which is from over-feeding fattening and heating foods and giving too little bone building material.

Look out for roup.

Give the cows salt.

Mules are easily raised.

Take care of your surplus garden crops.

A small fat sheep will pay better than a large poor one.

One pound hay and one pound grain per day per hundred weight.

Legumes should be included in every well planned rotation.

Sometimes the best live stock in the bunch are none too good.

When two years old the mule should be used at light work.

Remember that a blow in the eye is very liable to blind the horse.

Corn fodder, either shredded or whole, is a splendid feed for horses.

The corn shredder is quite as valuable as the corn binder for the stockman.

Storing cauliflower is not feasible, for growers at least, except in cold weather.

Second-crop alfalfa is fine for the pigs, but if pastured too closely it will soon run out.

The time of watering celery, with any kind of a sprinkling device, is an important matter.

New corn should be fed carefully, as fed in large quantities, it is apt to scour the birds.

Government whitewash will preserve the wood of old buildings more cheaply than paint.

According to conservative reports the Onion Set crop is much shorter this year than last year.

The foal will soon learn to drink from a pail, if allowed to suck the attendant's fingers at first.

If farm manure is used judiciously it will effect a permanent improvement in the yield of wheat.

Onions should be stored in a dry, cool, building where the air will circulate freely amongst them.

If the foreign demand is as great this year for apples as last the better grades will bring as much.

Cutting corn at so much per shock is nearly a thing of the past, since the advent of the corn blower.

If a horse has been accustomed to drinking before eating, then it is well to let the custom be continued.

The cost of harvesting an acre of corn will vary with the locality and amount of help that must be hired.

The farmer who so manages that he has something to sell the year around is never a complaining farmer.

Watch the hired man a bit and see that he is not continually jerking the horses and making their mouths sore.

For making plum puddings, duck eggs are more economical than those of other fowls, being both larger and richer.

Cleanliness should be the motto of every feeder. Sheep, above all other animals, detest filth and unsanitary yards.

If there isn't a good bull in your neighborhood, why not unite with a few good neighbors for the purchase of one?

Sheep quarters should be dry, clean and well kept. Also supplied with straw and litter and changed frequently.

Do you know of anything on the farm that will run fast money faster than hogs when around 6 or 7 cents per pound?

Save the timothy fields for a seed crop next year and increase them in size and number while present prices are maintained.

If your ewe aborts, take her at once from the lambing shed, burn litter, bedding, etc., and thoroughly disinfect the premises.

It is important that the ewes be got in good thrifty condition before breeding time, for on this condition largely depends the successful production of the coming crop of lambs.

In order to judge whether an animal is profitable or not, it is necessary to know the amount of milk she gives and the percentage of fat it contains.

The best stock is the stock that is never permitted to stop growing. Feed the calves so that their development will be natural from birth to maturity.

A capon is a castrated male bird. After being castrated the bird becomes more quiet, is more readily fattened, and the plumage becomes heavy and glossy.

Whenever any farm animal shows a disposition to eat wood, earth and other unnatural things, a change in feed is necessary. In most cases too much corn is being fed.

When to pick the peaches is an important question. You must not wait until the fruit is soft and you must not pick the peaches until they are nearly ripe, or well colored.

Cream is one of the most perishable articles of food, and must be obtained under favorable conditions if it is to be of any value.

The present wide use of the cream separator is due to the fact that it is so certain that this is the case. The first cost, and consequently the profit upon such coats, must naturally be greater, but as a set-off against this may we not ask how many, or rather how few, people can buy them at all? Then the further objection from the farmer's point of view that the present roomy garments do not rub or wear quickly, but can be made through so many stages that in the end they are far more profitable to the buyer than to the vendor.

With the advent of the bolero trousers will see their opportunity, and

FASHIONABLE FRINGES

CHENILLE POPULAR FOR FALL HAT TRIMMING.

Plumes, Pompons, Tassels and Rosettes Fashioned by the Clever Trimmer—"Rat-Tail" Is the Prettiest and Best.

Fringes of all descriptions, and especially those of chenille, appear on the new fall hats as a trimming. The cleverness of trimmers has fashioned them into plumes, pompons, cockades, tassels and rosettes, and they are used about the crowns as a finish. The "rat-tail" fringe of chenille, like that shown in the pictures, is the prettiest and best liked. Narrow, flat, silk fringes are used to cover crowns (and sometimes entire shapes), laid row after row over a silk foundation. Rat-tail fringes are shown in silver and gilt fabrics, and merit a better name than that given them, for they are elegant, giving a hint of splendor in millinery. The tinsel fringes are more sparingly used than those of silk or chenille.

The two models shown here are in black and white, but may be had in other color combinations. Fig. 1 is

hats are blue with green, brown with black, brown with white, purple with silver, petunia with silver, grey with white, etc. The hats would be pretty also made up in two shades of one color.

TO SOOTHE NERVOUS PEOPLE

Decorations and Furniture of the Boudoir Should Have Harmonizing and Restful Effect.

The boudoir when furnishing can be anything that fancy dictates. Imagine it in blue tones—blue which are soft and blend one into the other in perfect harmony. There might be a blue carpet with touches of mauve woven into its pattern. That pinky mauve which goes so well with blue chintzes should be in colors of mauve and blue, and a white paper on which sweet pens are the note of color would harmonize well. With a couch and large, comfortable chairs, a bureau, a small table and a bookcase of satinwood or of inlaid mahogany the room would be luxuriously dainty and restful. Another boudoir where the deep chintz covered chairs and settee radiate a white Robam carpet with a warm sage green and the curtains and window seating of that shade of red which seems to have faded to a sober

At this time of the year farmers are busy making miniature mountains on their holdings, mountains that will be scattered over the countryside before the winter is over.

The mountain question are those of vegetable produce that must be kept for several months, and sold as occasion requires. Potatoes, beet-root, carrots and turnips are raised from the ground in September and stored.

The farmer calls his hillock of vegetables a "mountain." He makes it on a piece of high ground near the home-stand, so that it may not be flooded, and many a big grower has clamped a quarter of a mile long.

First, a shallow ditch is dug on the piece of land selected. The base of this is lined with straw and the straw straw roots are heaped up firmly and carefully, till they resemble an elongated cone.

Over the sides of the cone more straw is laid, and on that again earth or, better still, turf, with their grassy sides inward. Dricks with the top cut from the straw will and a well-made clamp is frost proof, and also damp proof.

For Cramps.
A piece of old-fashioned candlewick worn around the ankle in the garter place, next to the skin, will prevent, or cure, cramp in the calf of the leg or in the foot. I have proved this by personal experience; I believe this would prove effective in preventing cramp while in the water would be wise to try it. Cotton batting, wrapped round the body from the armpits downward, saved the life of a man suffering from painters' cramp; it gave almost instant relief.—National Magazine.

To Mend an Umbrella.
To mend an umbrella that tears from the rib at the point, when you are on the street and needle and thread are not available, close the umbrella, bring the rib close to position, insert a small hairpin in the hole of the rib, and "bind" securely round cloth. This "first aid to the injured" is so efficient you will be tempted to leave it permanently.—National Magazine.

Important to Mothers
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of J. C. Fletcher in Use For Over 30 Years. Children Cry for Fletcher's Castoria

Color of Butterflies.
The colors of butterflies are influenced by the temperature of the air in which they live.

Not Modern.
"Why do you call it a fairy tale?"
"Because it ends: 'And they lived happily ever after.'"

Whenever you have a pain think of Hamline, Ward, Oil, Eye, Headache, Toothache, Paralysis, Stomach ache, and many other painful ailments there is nothing better.

Perhaps the most of us would be different if our neighbors were what they should be.

A man doesn't have to know much to know how little he knows.

CHANGES IN FUR FASHIONS

Revolution is Certainly as Soon as it Can Be Brought About by Furriers.

That there will be a revolution in fur fashions as soon as the manufacturers can bring it about is one of the things that may be foretold with safety. Apparently it is all in the interest of those who dress and sell peltry that the present wide use of the cream separator is due to the fact that it is so certain that this is the case. The first cost, and consequently the profit upon such coats, must naturally be greater, but as a set-off against this may we not ask how many, or rather how few, people can buy them at all? Then the further objection from the farmer's point of view that the present roomy garments do not rub or wear quickly, but can be made through so many stages that in the end they are far more profitable to the buyer than to the vendor.

Plaited Skirts.
Tailored skirts are to be both gored and plaited—the latter in clusters near the foot. With them are worn three-quarter length coats.

DESERVEDLY EJECTED.

They Are as Good for the Soul, Holmes Says, as Water for the Body.

One must be educated, no doubt, to understand the more complex and difficult kinds of musical composition, but to the concertgoer who you know that the music is good, and that you ought to like it whether you do or not. Take a music bath once or twice a week for a few seasons, and you will find that it is to the soul what the water bath is to the body. I wouldn't trouble myself about the affections of people who go to this or that series of concerts chiefly because it is fashionable. Some of the people who go to the concerts, I think, will perhaps find, sooner or later, that they have a dormant faculty which is at last waking up, and that they who came because others came, and began by staring at the audience, are listening to the music for its own sake. Everyone of us has a hand under the bodice or waistcoat, and if it can only once get properly strung and tuned it will respond to all outside harmonies.—Olive Wendell Holmes.

THE ANGLER'S BAIT.

A well-known angler at Peterborough, having obtained a "wasp" bait, placed the nest in the kitchen oven to kill the grubs so that he could use them for bait.

The next morning he went to get the grubs, but on opening the oven door a swarm of wasps flew out. The oven was not hot enough to kill the grubs, but was sufficiently warm to hatch them.—London Daily Mail.

The Worst Kind of Mortgage.

Is it not a disheartening thing to go through life under the shadow of debt, struggling to get release under circumstances that give no hope of relief? Is it not unfortunate to feel that we can never lift the mortgage from the home, that in spite of all our efforts it finally be sold over the heads of those lender to us than life itself? But all this is nothing compared with the mortgage of vice upon the character which blights the life.

Many a man has died without being able to lift the mortgage from his home, yet has been a real success, for he kept his mind clear, his integrity unimpaired, and, although he left no material wealth, he had enriched the lives of all who knew him.

The mortgage upon your vitality, the alcohol mortgage which hardens your nerve fibre, banishes the brain cells, paralyzes the power to achieve, and makes you a slave instead of a king, are encumbrances compared with which the mere mortgage upon your home is a blessing.

If you are mortgaged to the cigarette habit which demoralizes your ambition, poisons your blood, humiliates your nerves and vitiates your aim; if you have a whiskey mortgage, an immorality mortgage on your character which you have been trying for years to lift, this is infinitely worse than your chattel mortgage or real estate mortgage. The mortgage on your home may be touched your real self, in spite of it you may be a man, respected, looked up to, admired. If your life has been clean, you may have made every acre of land in your vicinity worth more. But if your character is mortgaged to a demoralizing habit, if you are the victim of a degenerating vice that holds you down, cripples your advances, this is a thousand times worse. It loses you not only your respect, but also the respect of those who know you.—Success Magazine.

How to Sleep.

Dr. Fisher, a physician practicing in Paris, has turned his attention to the matter of sleeping reform. After a series of experiments he has come to the conclusion that the orthodox way of sleeping is wrong, and advocates a complete reversal of the existing order of things. You must have your head on a level with or lower than your feet. If pillows are to be used they must be under the feet instead of the head. The result he claims, will be amazing, being sure cure for insomnia as well as a preventive for nightmaras. To prevent any inconvenience by too sudden a change the pillows should be gradually reduced and finally placed under the feet.

There's Something Back of a Trade-Mark

When a man does a thing he knows is 'good'—and other folks recognize it's good—he likes to sign his name to it.

Exactly the same rule applies in the manufacturing world.

When a manufacturer puts out a product that he knows has quality and the public approves of it as "quality"—then he puts a trade mark or a label on it. Where a label appears you can be pretty sure of more than ordinary quality.

Remember that when you're shopping. Take wearing apparel, for instance—

You'll find a lot of garments in our ready-to-wear section with Wooltex labels on. They have been proven extra good value. That's why we have them. We want to present to our customers the best there is in the market —and only that.

Just for a moment look at this

Wooltex Suit for Slender Figures

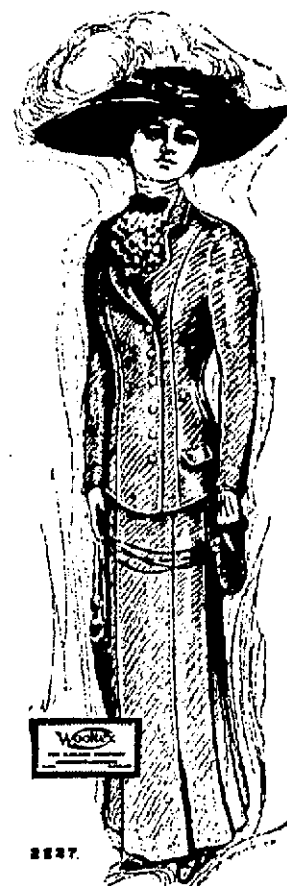

None but designers of the widest experience could tell you slender willowy women just what you'll look most charming in. And you've only to try this suit on to prove that its far and away ahead of anything you've seen for the purpose and at the price.

That picture doesn't tell all the story. To appreciate it you've got to see your own slim and slender self reflected in the mirror of that suit.

We've equally satisfactory Wooltex models for the stylish stout woman, for the little woman and for every other type who may think she is hard to fit. An early call will help both you and us.

JOHNSON & HILL CO.

THE STORE THAT SELLS WOOLTEX

That will show you at once why Wooltex people are proud to put their label in it—and why we're proud to show it to you.

It fits and suits and satisfies the woman who wears it. That's what the Wooltex guarantee and label mean. That's why we approve of Wooltex garments and we show them and sell them season after season.

STOP A MOMENT

SO conveniently arranged are our clothes that we can accomplish in a few moments what in some stores takes an hour or more.

Stop a moment to-morrow and glance through our cold season suits. Many of them are

Sincerity Clothes

but regardless of make, all are sold with a sincere desire to please you.

The man with \$15.00 to spend is as welcome here as the man with \$40.00. Don't overlook us and you won't overlook true service.

YOU'LL find this store the easiest store to do business in you ever visited, because the things you want in clothes are here; the styles, the qualities, the variety of fabrics—because the prices and values for them are here, and because we're here to help you buy what you want, not merely to sell you something.

It's worth a visit to the store, even if that's all you come for, to see the Hart Schaffner & Marx Suits and Overcoats we're offering at \$18 and \$25. Goods made exclusively for us, our own selections, patterns and weaves; our own ideas in models perfectly carried out. An illustration of how good clothes can be made to sell at \$18 and \$25.
